

# DIGICOM WIRELESS

AREA WIDE CBD NETWORK

ARE YOU READY TO TAKE  
YOUR COMMUNICATIONS  
TO THE NEXT LEVEL?

WE KEEP YOU CONNECTED

## **ARE YOU READY TO TAKE YOUR COMMUNICATIONS TO THE NEXT LEVEL?**

Needing more coverage or specialised solutions for your onsite radio communications? Why limit yourself to the standard? Whether you require site wide coverage or area wide networks, Digicom Wireless is a family owned, Australian run business specialising in the delivery of telecommunications solutions throughout Australia. We design, build, install and commission systems for all levels of requirements.

Digicom Wireless has provided numerous turn key solutions to a variety of organisations across the nation, incorporating specific coverage needs with bespoke capabilities. This has armed Digicom Wireless with the skills and experience necessary to address complex, constantly changing and diverse requirements.

Digicom offers a New South Wales, CBD System which allows users to connect from Sydney CBD site to receive enhanced coverage throughout the Metropolitan area. Digicom provides trunked and conventional two-way radio networks for communications delivered over various UHF frequencies. Using this specialised system will provide you with over **80km** of coverage compared to your standard Two Way System.
